Unlimited Finishes

NO LIMITS. NO RESTRICTIONS.

Designed to stay cool with Regency's patented Cool Wall System to accommodate custom finishes right to the edge of your fireplace!

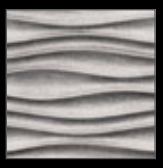
ADVANTAGES

- Place a TV above the fireplace without it getting damaged
- Hang artwork without fear of warping
- Paint will not discolor, drywall will not crack
- No internal fans required
- Use any of the examples below to finish right to the edge of the fire, even wood or wallpaper

Wood

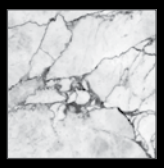
Wallpaper

Fabric



Textured Panel

Metal



Marble

Tile

Embossed Panel

Glass

Faux Stone

FRAMELESS FIRE

- An uninterrupted view of the flames
- Seamlessly integrates into any interior
- Patented invisible glass safety barrier
- No frames, mesh or silicone
- Multiple interior liner panel options
- Available in single-sided, two-sided and three-sided designs

New York View 40 shown with black reflective crystals, crushed coal black glass, reflective black enamel interior panels & extended view panels.

Extended View Panels

Flush to the wall and reflective, black glass extended view panels focus the eye, create visual balance, and amplify flames for maximum impact. A literal expansion of City Series' frameless firebox, extended view panels integrate seamlessly for a striking, modern, linear look.

- Create the illusion of a larger fireplace
- Establish balance on a multi-function fireplace feature wall
- Black glass reflective finish amplifies the flame experience
- Can be used on New York 40 & 60 models to extend the length by 610 mm

1

In this photo, the fireplace is overshadowed by a large television, creating a top heavy fireplace feature wall

2

In this photo, the fireplace achieves visual prominence and balance with the addition of black glass extended view panels

Controllable Warmth

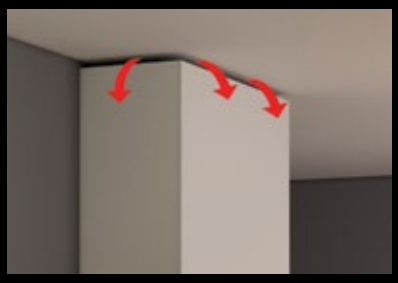
FLEXIBLE VENTING OPTIONS

Regency's patented Cool Wall System releases warmth at ceiling level. This system reduces excessive radiant heat in front of the fireplace so you can enjoy your fireplace more often.

- Design your own chase vent solution to suit your home
- Use optional front or left & right side* chase vent grills
- Release warmth into the room discreetly

Front

Side* (left & right)



Top

** When choosing the side venting option, vent grills must be on both sides with a minimum of a 50/50 split. One side cannot be less than the required minimum size of the required ventilation to equal 100%.*

COOL WALL SYSTEM

Cool air is drawn into the system around the floating glass safety barrier. Cooler air is then split between the heat exchanger and the inside wall surface.

The air travelling through the heat exchanger is heated by the fireplace and then directed out the back of the fireplace. The combined warmed air is then vented back into the room.

ENJOY YOUR REGENCY — FOR LIFE

You'll be happy with your Regency for years to come, our Limited Lifetime Warranty guarantees it. Not only have we invested in quality workmanship, the finest materials and durable heavy-duty construction but we have carefully selected a dealer network that is committed to your satisfaction. All Regency gas fires pass stringent Australian testing standards. We know that you will be as proud of your Regency as we are.
Limited Lifetime Warranty covers the following components: Combustion chamber, heat exchanger, burner tubes and glass (thermal breakage).
Refer to owner's manual for details.

NOTE: All product specifications are subject to change without notice. Before installing refer to the relevant product manual for full and up to date information. Stainless steel inner panels will naturally change tone over time. Heating capabilities of units are affected by: drafts under doorways or through flooring, large glass areas not covered by heavy drapes, ceiling heights greater than 2.4m or cathedral type ceilings, poor or no insulation and geographical locations.
